

# LEIOS Technologies

We bring innovation and excellence together—leveraging GenAI and digital expertise to turn challenges into opportunities and empower businesses to thrive in the modern era.

# Empowering Businesses in the Digital & GenAI Era

We are a consultancy built on the principles of **innovation, excellence, and transformation**. By harnessing the power of **GenAI, digital platforms, and creative problem-solving**, we help organizations navigate disruption and unlock new opportunities. Our diverse expertise enables us to design tailored strategies that not only solve today's challenges but also build resilience for the future. With a focus on measurable impact, we empower businesses to **adapt, scale, and thrive in the digital and GenAI era**.

# Core Values

Our core values define who we are and how we operate, guiding every client engagement and strategic recommendation.

## Innovation

Driving transformative change with GenAI and digital strategies to pioneer new market opportunities.

## Excellence

Delivering unparalleled solutions that exceed client expectations and yield measurable, lasting value.

## Integrity

Upholding ethical standards, fostering transparent partnerships, and providing unbiased advice for long-term success.

## Collaboration

Partnering deeply with clients to co-create bespoke solutions and achieve superior, shared outcomes.

# Featured Projects

Our extensive portfolio showcases successful projects across diverse industries, where we tackle complex business challenges with innovative technology. While client names remain confidential, the following highlights illustrate the **breadth, depth, and impact** of our engagements.

## Digital Transformation

Orchestrating comprehensive, enterprise-scale initiatives that redefine operational models and unlock new avenues for growth.

## AI & Generative AI

Developing cutting-edge artificial intelligence and generative AI solutions to automate processes, personalize experiences, and drive predictive insights.

## FinTech & Payments Platforms

Building secure, high-performance FinTech and payments platforms ensuring rapid transactions, robust security, and unwavering reliability.

## Consumer & E-commerce Applications

Crafting high-performance consumer and e-commerce applications designed for engaging user experiences and seamless scalability.

## Cloud Modernization & Data Engineering

Delivering robust cloud modernization and advanced data engineering solutions to build scalable, resilient, and intelligent infrastructure.

Client names have been omitted to honor confidentiality agreements. Details presented are for illustrative and reference purposes only.

# Seamless UPI Integration for a Leading FinTech Startup

## Overview

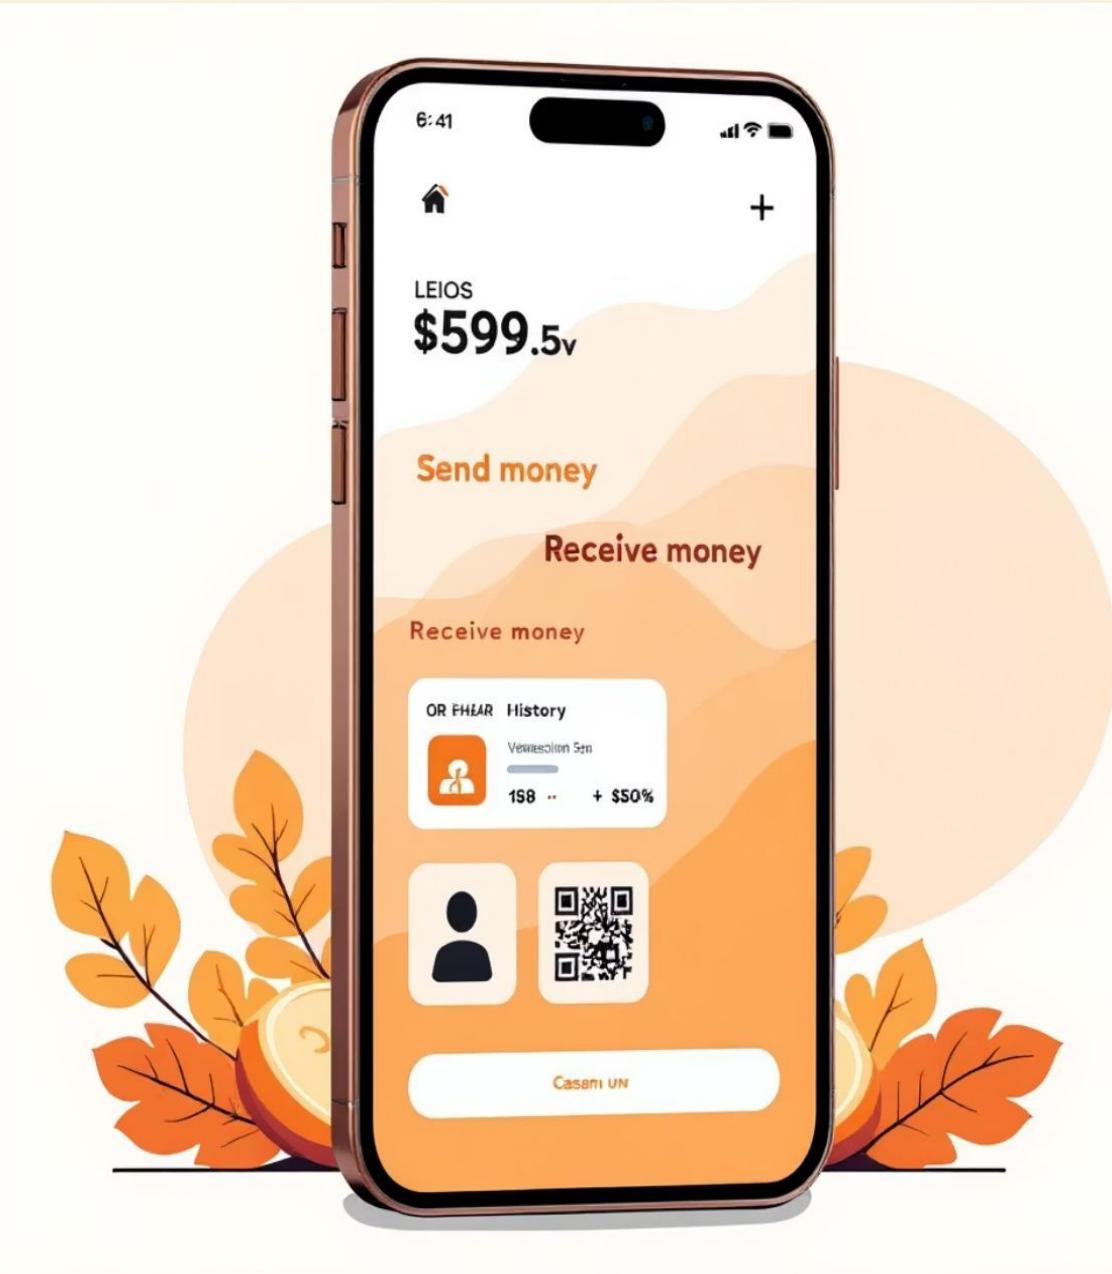

A cutting-edge mobile app revolutionizing digital payments. It offers seamless P2P transfers, secure account management, and instant transactions, prioritizing speed, transparency, and robust reliability for a superior user journey.

### Key Features

- Instant Digital & QR Payments
- Automated Top-up & Recurring Payments
- Personalized Expense Insights
- Integrated Cashback & Loyalty Programs
- Advanced Secure Authentication & Onboarding

### Technology Stack

- Robust Payment Network Integration
- Secure API Endpoints
- State-of-the-art Encryption & Tokenization
- Highly Scalable Backend Infrastructure

# AI Chatbot for E-Commerce

## Overview

An advanced AI-powered chatbot for e-commerce platforms, offering intelligent assistance for product discovery, personalized recommendations, and efficient customer support. It streamlines the shopping experience and ensures seamless transitions to human agents when needed.

### Key Features

- Smart shopping assistant
- Personalized recommendations
- Order & support tracking
- Product comparison
- Seamless human agent handoff

### Technology Stack

- GenAI & LLMs
- Vector DB & ML models
- APIs & WebSockets
- Cloud infrastructure
- Observability tools

# Job Search Platform

## Overview

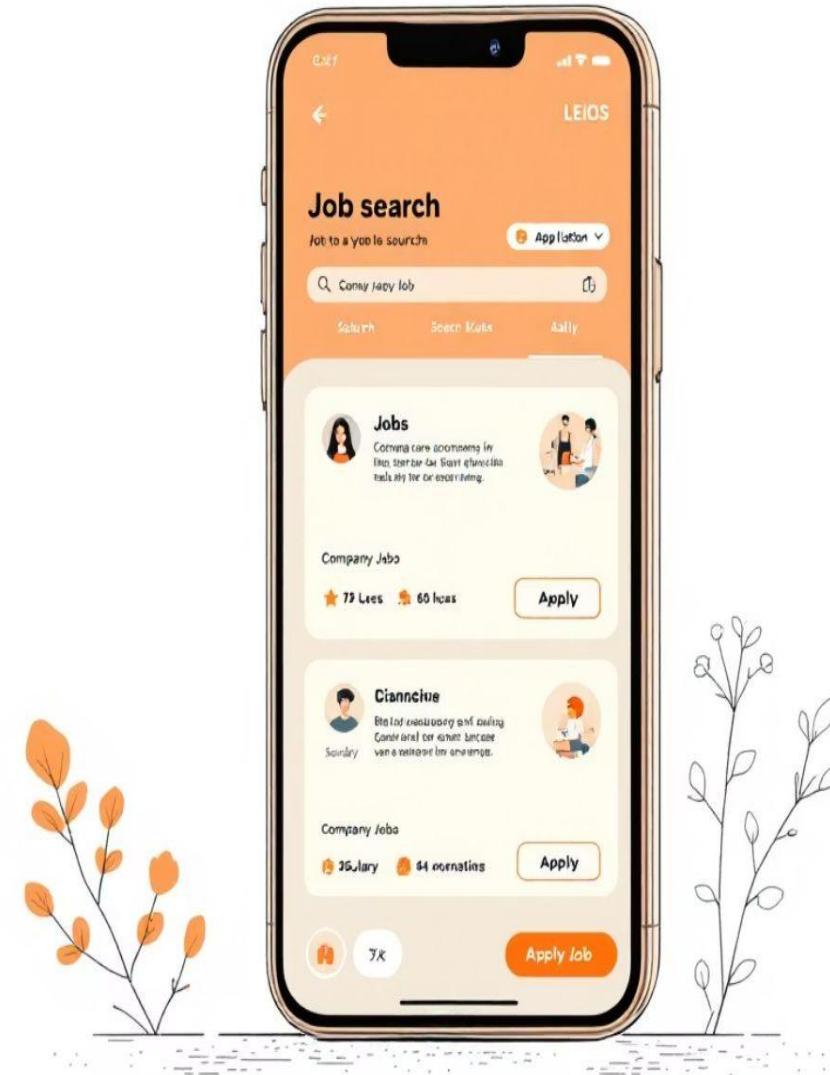

Android and iOS app for discovering, applying, and tracking job opportunities with personalized recommendations and secure access — designed for high performance and user engagement.

### Key Features

- Search & filter jobs
- Resume upload & profile builder
- Save & track applications
- Job alerts & notifications
- User authentication & personalization

### Technology Stack

- Cloud Firestore → job data storage & retrieval
- Cloud Endpoints / API Gateway → secure API management
- Firebase Authentication → login & session handling
- Cloud Storage → resumes & documents
- Scalable GCP backend → reliable performance under high traffic
